

Assignment - 5

File Name	Line	Category	Problem Found	Resolution
1.c	18	Syntax Error	Missing closing brace <code>}</code> at the end of the main function structure.	Add closing brace <code>}</code> to terminate the block.
2.c	24	Runtime Risk	Infinite loop condition detected because the counter variable is never changed.	Insert <code>i++;</code> statement within the loop body.
3.c	09	Type Conflict	Direct implicit conversion assignment from float constant to integer without casting.	Change declaration to: <code>float tax = 0.05;</code>
4.c	31	Memory Error	Array index out of bounds; attempting to access index position 10 on size 10 array.	Update loop condition to loop limit: <code>i < 10</code>
5.c	15	Pointer Bug	Dereferencing an uninitialized pointer target variable directly.	Link a valid address before reference: <code>ptr = &num;</code>
