

Assignment -4

Question No.	Line No.	Error Type	Error Description	Correction
1.c	9	Array Error	Accessing array index out of bounds (trying to access index 10 in an array of size 10).	Change loop condition to stop before index 10: <code>i < 10</code>
2.c	18	Syntax Error	Missing closing brace <code>}</code> for the main function block.	Add closing brace <code>}</code> at the end of the code.
3.c	24	Pointer Error	Dereferencing an uninitialized pointer variable.	Assign a valid address before using the pointer: <code>ptr = #</code>
4.c	31	Logical Error	Infinite loop because the loop counter variable is never updated.	Add increment operator inside the loop: <code>i++</code> ;
5.c	15	Data Type Error	Assigning a floating-point value to an integer variable without proper type handling.	Change variable type to float: <code>float tax = 0.05;</code>
